# Who we are?

KHMER CERAMICS® is our brand, since 2006 we are specialized in the manufacturing of handmade stoneware dinnerware and decoration. We are located in Cambodia and follows the SA 8000® international standard.

In addition, KHMER CERAMICS® is the artisanal result of a passionate and talented team of craftspeople.

Our passion and artisanal focus allow us to differentiate ourselves from others conventional ceramic brands by having the abilities to offer high-quality HANDMADE dinnerware.

## Handmade

While most ceramics brands and dinnerware manufacturers using machines, printers, and robotic processes to imitate the beauty of handmade products. We decided to produce real handmade as we believe genuine products is always better than any imitation. Instead, we focus on real people - the real source of REAL handmade. By focusing on people we maintain the soul of the art and ensure that each piece is a unique exceptional hand-crafted work with its own soul and history. On the other hand, as a social enterprise, this process ensures the transmission of know-how, while providing an opportunity for hundreds of craftsman to live from their art.

Moreover, we offer opportunities to local craftspeople, generate sustainable and fair employment for the artisans.

# Stoneware

Stoneware ceramics feature a wide range of glaze with countless possibilities. These glazes finish are unreproducible with porcelain or bone china.

All our Collection feature our amazing reactivities and micro-reactive glazes.

This is a perfect example of the beauty and simplicity of stoneware glazes.

In addition, Our Stoneware ceramics are fired at an extremely high temperature which give them an incredible durability.

The very high firing temperature allows to fully vitrify our stoneware body and for this reason, the items become dishwasher, oven, and microwave-safe.

All moderns quality standards are guaranteed.

Their extreme durability, strength and resistance ensures they are practical and functional, as well as elegant and decorative, enabling them to be used for any purpose.

# Our Glazes & Finishes

## Micro Reactive Glaze

Our glazes are admired for their particularity to produce a micro-reaction during the firing. This micro-reaction create an interesting variegation in the color of the glaze and finish.

Unlike other reactive glazes, this reaction is obtained by using a single glaze (one layer).

## 100% Food Safe & Natural

The selection of our raw material is a priority for KHMER CERAMICS. This proximity to Mother Nature is paramount to be able to guaranty the purity of our dinnerware.

On the other hand, using only natural products allows us to respect the environment, while assuring the sustainability of resources and the health and welfare of the local community.

## Proudly Handmade

KHMER CERAMICS dinnerware is proudly handmade since 2006 and remains to be.

Indeed, behind each plate, bowl or any other piece of the Coco Handmade collections it is an artisan who personally signs the fruit of his hard work.

The handmade process guaranty that each piece is a unique exceptional hand-crafted work with its own soul and history.

Moreover, this combines functionality with the elegance that can only be achieved through exquisite hand-crafting.

## Perfectly Imperfect

The Coco Handmade Collections are made by shaping a slab/sheet of clay into plate/bowl. This uncommon technique allows us to obtain shapes variation which give each piece is subtly one-of-a-kind.

Due to this shaping technique, bowls from this collection are only partially stackable. However, plates remain fully stackable.

## Unglazed & Polished

Another particularity of our Coco Handmade Collections, is the unglazed bottom feet. Instead, they are polished to give a smooth finish and a unique unusual look.

The polished stoneware recalls the beauty of the material used by the craftsman to produce this item.
